

Amendments to the Abstract

Please amend the Abstract, on page 76, lines 6-14, as follows:

Molecular conjugates comprising an antigen linked to a ~~Isolated~~ human monoclonal antibody that ~~antibodies and antigen-binding portions thereof which specifically binds~~ bind to dendritic cells are disclosed. ~~Also disclosed are bispecifics, immunotoxins and antigen conjugates which include the antibodies or antibody portions. The human antibodies can be produced in a non-human transgenic animal, e.g., a transgenic mouse, capable of producing multiple isotypes of human monoclonal antibodies by undergoing V-D-J recombination and isotype switching.~~ Also disclosed are pharmaceutical compositions comprising the molecular conjugates ~~human antibodies, non-human transgenic animals and hybridomas which produce the human antibodies,~~ and therapeutic and diagnostic methods for using the conjugates ~~human antibodies.~~
